

GrouperShell (gsh) Provisionable folder finder (ProvisionableStemFinder)

Wiki Home	Grouper Release Announcements	Grouper Guides	Grouper Deployment Guide	Community Contributions	Internal Developer Resources
---------------------------	---	--------------------------------	--	---	--

Use this class to find provisioning attributes on stems

Sample call

```
ProvisionableStemFinder provisionableStemFinder = new ProvisionableStemFinder();
GrouperProvisioningAttributeValue attributeValue = provisionableStemFinder.assignStem(stem).
assignTargetName("ldapProvTest")
    .findProvisionableStemAttributeValue();
```

Sample call to find multiple provisioning attributes on a stem

```
ProvisionableStemFinder provisionableStemFinder = new ProvisionableStemFinder();
Set<GrouperProvisioningAttributeValue> provisionableStemAttributeValues =
provisionableStemFinder.assignStemName(stem.getName()).findProvisionableStemAttributeValues();
```
