

GrouperShell (gsh) Member finder (MemberFinder)

Wiki Home	Grouper Release Announcements	Grouper Guides	Grouper Deployment Guide	Community Contributions	Internal Developer Resources
---------------------------	---	--------------------------------	--	---	--

Use this class to find members within the Groups registry

Sample call

```
Set members = MemberFinder.findAll(grouperSession, gsaSource);
```

Sample call to find members by attribute def names

```
Set members = new MemberFinder().assignNameOfAttributeDefName(attributeDefName.getName())
    .assignAttributeCheckReadOnAttributeDef(true).assignQueryOptions(QueryOptions.create
("subjectId", true, null, null)).findMembers();
```
