

Registry 3.3.3 Release Announcement

Internet2 and the COnanage Project are today announcing the release of COnanage Registry version 3.3.3. This release is a maintenance release. This version contains various bug fixes.

We recommend all deployments upgrade to this release.

Two Security Advisories are being posted along with this release. While neither Advisory is expected to apply to most deployments, all deployments should review both Advisories to determine if any action is warranted. Further details are posted to the [COnanage Registry Security Advisories](#) page.

This is expected to be the last release in the 3.x series.

Full release notes are available at <https://spaces.at.internet2.edu/display/COnanage/Release+History>

COnanage is funded by Internet2 and other sources. For further information about COnanage, including a list of funders, and to download the software, please visit: <http://www.internet2.edu/comanage> and <https://spaces.at.internet2.edu/display/COnanage>
