

# cm\_names

|             |              |
|-------------|--------------|
| Table       | cm_names     |
| Description | Person names |

| Column          | Format               | Description                                                                                                                                                            | Definition                           | Comments                                                                                                                         |
|-----------------|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| id              | integer, primary key | Row identifier                                                                                                                                                         | autoincrement                        |                                                                                                                                  |
| honorific       | varchar(32)          | Dr, Mr, Ms, etc                                                                                                                                                        |                                      |                                                                                                                                  |
| given           | varchar(128)         | First/Given name(s)                                                                                                                                                    |                                      |                                                                                                                                  |
| middle          | varchar(128)         | Middle name(s)                                                                                                                                                         |                                      |                                                                                                                                  |
| family          | varchar(128)         | Last/Family name(s)                                                                                                                                                    |                                      |                                                                                                                                  |
| suffix          | varchar(32)          | Jr, III, PhD, etc                                                                                                                                                      |                                      |                                                                                                                                  |
| language        | varchar(16)          | Language encoding of this name                                                                                                                                         | <a href="#">RFC 5646</a>             | For supported values, see <code>lang.php</code>                                                                                  |
| type            | varchar(2)           |                                                                                                                                                                        |                                      | When attached to a CO Person, types may be configured on a per-CO basis. See <a href="#">Extending the Registry Data Model</a> . |
| primary_name    | boolean              | <ul style="list-style-type: none"><li>true: This name is the primary name for the CO Person or Org Identity</li><li>false: This name is not the primary name</li></ul> |                                      | Exactly one name per CO Person and one per Org Identity should have <code>primary_name</code> true at all times                  |
| co_person_id    | integer, foreign key | CO Person Record ID                                                                                                                                                    | <a href="#">cm_co_people:id</a>      | Only one of <code>co_person_id</code> or <code>org_identity_id</code> may be specified                                           |
| org_identity_id | integer, foreign key | Org Identity Record ID                                                                                                                                                 | <a href="#">cm_org_identities:id</a> | Only one of <code>co_person_id</code> or <code>org_identity_id</code> may be specified                                           |
| source_name_id  | integer, foreign key | If Pipelines are in use, the Name ID for the Org Identity Name that created this Name                                                                                  | <a href="#">cm_names:id</a>          |                                                                                                                                  |
