

# Grouper rules pattern - Add created groups to another group

- Wiki Home
- Download Grouper
- Grouper Guides
- Community Contributions
- Developer Resources
- Deployment Guide

You can add this rule to a group where the groups would be added. TODO: change this wiki for the new enum (*addGroupToOwnerGroup*)

## Configure rule

The screenshot shows the Grouper web interface for a folder named 'source'. It displays a table of attribute assignments for this folder. The table includes columns for Assignment type, Attribute name, Enabled?, Assignment values, and Attribute definition. The assignments are as follows:

Assignment type	Attribute name	Enabled?	Assignment values	Attribute definition
Direct assignment	rule	enabled		rulesTypeDef
Metadata on assignment	ruleActAsSubjectId	enabled	GrouperSystem	rulesAttrDef
Metadata on assignment	ruleActAsSubjectSourceId	enabled	g:isa	rulesAttrDef
Metadata on assignment	ruleCheckStemScope	enabled	SUB	rulesAttrDef
Metadata on assignment	ruleCheckType	enabled	groupCreate	rulesAttrDef
Metadata on assignment	ruleThenEI	enabled	<code>\${ruleUtils.group(null, 'destination:groupOfGroups', null, true, true).addMember(ruleUtils.group(null, groupName, null, true, true).toSubject(), false)}</code>	rulesAttrDef
Metadata on assignment	ruleValid	enabled	T	rulesAttrDef

Attribute	Attribute metadata	Value
rule		
	ruleActAsSubjectId	GrouperSystem
	ruleActAsSubjectSourceId	g:isa
	ruleCheckStemScope	SUB
	ruleCheckType	groupCreate
	ruleThenEI	<code>\${ruleUtils.group(null, 'destination:groupOfGroups', null, true, true).addMember(ruleUtils.group(null, groupName, null, true, true).toSubject(), false)}</code>
	ruleValid	T
