Internet2

- Ann West
- Netta Caligari
- Kevin Morooney

Regrets

- Steve Zoppi
- Nicole Roy
- David Walker

Action Items

- Watch for the Chair and Vice-Chair ballots from Nicole, then vote.

Discussion

Announcements and Updates

- John Bradley: The U2F API is being deprecated in Chrome 76.

PeopleSoft Integration Working Group

- Pre-read: [PeopleSoft Integration Working Group charter](#)
- The proposal is to look at how to integrate PeopleSoft tools with our standard IAM tools.
- Rob reviewed the draft charter.
- CACTI accepted the charter with suggestions to include SSO integration explicitly and to add either an end date or a date when the charter is reviewed.

2022 CACTI Leadership Discussion

- Next call will include the two new CACTI members.
- Nicole will post roster of candidates for two leadership positions. Everyone gets two votes. The candidate with the most votes becomes the Chair; second place candidate will become the Vice Chair.
- Let Nicole know if you don't want to be a candidate; otherwise, you'll be one.
- There's no deadline but it would be good to wrap things up by the end of the year.
- **Action:** Watch for the Chair and Vice-Chair ballots from Nicole, then vote.

Questions For The Community

Rob reviewed [SWAG at categorizing Educause questions](#), [ACAMP topics](#)

- EDUCAUSE questions were...
 - About 50/50 strategy vs. tactic
 - About 2:1 technology vs. organization
 - About 40% focused on specific product, about 50% of those on vendor product, 27% on TAP
 - About 58% on benchmarking against others or "best practices"
- ACAMP session topics were...
 - Not dissimilar for strategy vs. tactic
 - About 89% technical vs. organizational
 - Much more heavily focused on FOSS
 - More focused on federation
 - Less focused on benchmarking and organization

- More focused on security/privacy
- Microsoft products were more prevalent in EDUCAUSE than ACAMP
- Microsoft and cloud decisions are most likely made top-down, based on cost and resource allocation.
 - Criteria (and decisions) at the bottom are likely different
 - CACTI should try to tease out these issues.
- The raw data is linked from the last slide.

Next CACTI Meeting: [Tuesday, December 7 2021](#)
