

Registry 4.0.2 Release Announcement

Internet2 and the COnanage Project are today announcing the release of COnanage Registry version 4.0.2. This release is a maintenance release. This version contains various bug fixes.

We recommend all deployments upgrade to this release.

A Security Advisory is being posted along with this release. While this Advisory is not expected to apply to most deployments, all deployments should review the Advisory to determine if any action is warranted. Further details are posted to the [COnanage Registry Security Advisories](#) page.

Full release notes are available at <https://spaces.at.internet2.edu/display/COnanage/Release+History>

COnanage is funded by Internet2 and other sources. For further information about COnanage, including a list of funders, and to download the software, please visit: <https://www.internet2.edu/comanage> and <https://spaces.at.internet2.edu/display/COnanage>
