

Registry PE Permissions

Registry PE changes the Permissions structure slightly from [earlier versions](#).

- **Platform Administrators** have full access to the entire platform.
- **CO Administrators** have full access to their CO(s).
- **COU Administrators** can view Person records within their CO, and manage Person Role records within their COU.
- **Support Operators** have read-only access to all Person records within the CO.
- By default, nobody else has access to the Registry application. All other permissions can be granted via Dashboard Widgets.
