idp-support-personalized-access

This instruction applies to identity provider (IdP) metadata only.

> ⓘ **Important considerations when working with the "Access" categories**
>
> IdP Operator: if a service provider is registered with more than one (Anonymous Access, Pseudonymous Access, Personalized Access categories, Research and Scholarship), you have the discretion to decide which category applies when releasing user information.

To declare support for the REFEDS Personalized Access entity category:

Log in to Federation Manager and click your SP's entity ID in the list of Existing Identity Providers.

Click "Entity Attributes" from the left navigation. The Entity Attributes section appears.

Check the box under the Assert Column for the row labeled **REFEDS Personalized Access Support**. Make sure the **"Hide from Discovery"** Entity Attribute is unchecked**.** If your user can't find your IdP from the list of available SSO options in the Discovery Service, they can't use it to sign in to participate in academic collaboration.

Working with SAML metadata

- Manage metadata export options
- Qualifications and Capabilities (Entity Attributes, etc.)
- SAML Representation of InCommon Metadata
- Requested Attributes
- Entity ID
- Scope
- Contacts information
- IdP SSO Settings (IDPSSODescriptor)
- SP SSO Settings (SPSSODescriptor)
