

Working Group Seeks Feedback on Active Directory Cookbook for Silver

A community working group is seeking feedback on the InCommon Silver with Active Directory Cookbook (<https://spaces.at.internet2.edu/x/w56KAQ>) during a public review period that will be open from January 12th through January 31st.

A number of InCommon participant institutions have been preparing to submit applications to the assurance program, and specifically, to be able to assert the InCommon Silver level of assurance. This draft “cookbook” is intended to help those who have Microsoft’s Active Directory Domain Services (commonly referred to as “Active Directory” or “AD”) deployed, be able to configure it for compliance with the technical requirements for Silver. Comments can be sent to assurance-adsilver@incommon.org.
