URI under macedir.org

macedir.org is newly registered. so is the subdomain
id.macedir.org

So one candidate for an container attribute for entity categories could be:

http://id.macedir.org/attribute/entityCategory

Then "we," (the mythical distributed-admin inter-federation registration authority), could register individual EntityCategory values:

- http://id.macedir.org/attribute/entityCategory/foo
- http://id.macedir.org/attribute/entityCategory/bar
- http://id.macedir.org/attribute/entityCategory/research-and-scholarship
- ...
