Action Items

1. Dedra - put links in the wiki for the OpenEMPI whitepapers, Jimmy's strawman, and Lucas' matrix (based on Jimmy's strawman). Mail that out to the group
   a. Group - review these documents, note any questions or missing things from the strawman or matrix your group might want/need
2. Venu - plug away at getting OpenEMPI up and running.
3. Dedra - Poll group about moving meeting to 12pm instead of 11am (EDT)

Notes

OpenEMPI tool

- CSV file for initial load
- for real-time matching at account creation, would call add user feature

Use cases that we need to explore

- multiple addresses
- multiple last names
- can tool fetch info out of source systems directly
- how to call at account creation time via API
- supported matching algorithms (documentation says you can replace the implementation of any given algorithm)
- internationalization

Registry veal responses and code review plan

- Each team will present evaluation plan next week
