Scrum - week of 2012-03-19

Items covered for this sprint

- jira tickets listed here

2012-03-19 scrum call

Attending

- Benn
- Marie
- Heather

Scruminess

- What have you done since the previous call?
    - Benn - working on getting the validation working in enrollment petition form
    - Marie - getting UI stuff working; some things are not showing up on other pages which may or may not be a permissions issue

- What are you planning to do between now and the next call?
    - Benn - more on validation
    - Marie - continue to work on UI stuff

- Any impediments/stumbling blocks?
    - Benn - none
    - Marie - question on permissions ("viewvar"); it didn't seem to change, but something is not working properly for Marie

2012-03-21 scrum call

Attending

- Benn
- Marie
- Heather

Scruminess

- What have you done since the previous call?
    - Benn - partial commits for petitions
    - Marie - have all the UI 1.3 stuff converted to 2.0 for the headers

- What are you planning to do between now and the next call?
    - Benn - working on the rest of the petitions stuff
    - Marie - will continue to hunt down bugs in the 2.0 conversion of UI headers; cleaning up html/css

- Any impediments/stumbling blocks?
    - Benn - none
    - Marie - none

2012-03-23 dev call

Attending

Agenda

1. Scrum

- What have you done since the previous call?
    - Benn - petitions controller
    - Scott - n/a
    - Marie - cleanup on UI

- What are you planning to do between now and the next call?
    - Benn - petitions controller and partial commit expected
    - Scott - grouper integration work
    - Marie - some more cleanup on UI, sending files to Benn

- Any impediments/stumbling blocks?
    - Benn - none
    - Scott - none
    - Marie - none

1. Review of what's due vs demo deadline (see Roadmap view)
   key work in petitions, grouper, UI; hold off panic regarding list until April 6

1. I2MM travel logistics vs demo planning
   aiming for updating the demo script Saturday night before the meeting; this will between Benn and Heather, and we'll review it with the Dev team Sunday morning

1. OSIdM4HE Phoenix f2f

- how to represent the VO view at the table?
    - VO don't come to the table with the right vocabulary or background to know what an IdM should look like; they always grow up organically and with gaps in the infrastructure; IdM as a toolset to be offered to VO would be huge, but how this would work given lack of understanding is challenging
- Next week's meeting will be about marketing materials and figuring out to attract investors; we can say that part of the materials that need to be generated over time is materials for VO architects, and even more for VO that need an architect and don't have one but they do have scientists, and that's to whom this must be sold; the community should be watching what is happening with the Globus Online effort b/c they are going to go after this space and offer science VO IdM and more as hosted services; any discussion about VO and this space has to include info on what Globus is doing
- this should be brought up in more detail in the hallway or as a BoF at the member meeting

1. Review upcoming schedules
   moving scrum later 30 minutes

1. log() vs debug()
2. Email from Scott: "requirements to translate"
