Grouper Wiki Home

Working Group Chair: Chris Hyzer, University of Pennsylvania

Welcome to the Grouper Wiki. This is the primary documentation for Grouper, and is a community-maintained repository consisting of technical information you need to know prior to installing Grouper, installation/configuration guides, and case studies contributed by the Grouper community.

Internet2's Grouper enables project managers, departments, institutions and end users to create and manage institutional and personal groups, roles and permissions.

Grouper is part of the InCommon Trusted Access Platform.

Grouper v4 is the stable no-enhancement version of v2.6

- Grouper Website Home
- Grouper working group minutes
- Grouper History

Reporting Problems and Providing Feedback

Grouper Security Issue Report : This is how to report Grouper security issues.

Grouper Wiki Issues : This is the place to report issues found with the Grouper wiki, e.g. pages missing, out of date, or mis-linked.

Grouper Documentation Request and Suggestions : This is the place to request documentation about a specific aspect of Grouper installation, configuration, or maintenance; or to make suggestions about how existing documentation could be reconfigured or improved. Note that the Grouper wiki space is editable by any authenticated user, and you are encouraged to submit new documentation or to modify any existing documentation as you think appropriate.

Additional Documentation

Specsheet - Offers operational specifications for the development and deployment of Grouper.
License - Terms under which Grouper is licensed, the Apache 2.0 license.
Archives - Detailed feature information and downloads of previous Grouper versions.
Versioning and Support Policy - Guidelines for application of security patches to previous versions.
Grouper Trademark Guidelines and Styleguide - Usage policy for the Grouper logo.
