Goal

Assemble a strawman that we can then review (and possibly replace) as a larger group,

Agenda

1. Review/Assemble Agenda
2. Agree on format and contents of the "strawman" proposal.
3. Define and document core use cases for SOR->Registry integration upon which to base design work
4. Assemble/reaffirm CIFER reference architecture for SOR and Registry components in relation to provisioning.
5. Discuss approach for API design for this integration
6. Assemble above information into strawman proposal
7. If we have time:
   - Initial API design work
   - Discuss content of registries presentation for Wednesday

Action Items
