Scrum - week of 2012-09-10

2012-09-10 scrum call

Attending

- Marie
- Benn
- Scott
- Heather

Items covered for this sprint

- jira tickets listed here

Scruminess

- What have you done since the previous call?
    - Marie: worked on the redirects and sidebar; the redirects are more complicated than expected (known cake bug) and is using hidden fields instead
    - Benn: created a list of what we need to do to get account linking working for the demo at the I2FMM12
    - Scott: started working on the delete for the grouper work;

- What are you planning to do between now and the next call?
    - Marie: will continue to work on redirects, but uncertain how much more time to put in to it; general thought is that working through with the hidden fields is probably the way to go at this point, but should put up the fix in one controller on coriander so group can test
    - Benn: need to review demo (will talk to HF Tuesday morning)
    - Scott: grouper

- Any impediments/stumbling blocks?
    - Marie: may need time w/ Benn on the redirect problem
    - Benn: need to know what we're doing for the demo
    - Scott: grouper questions (covered on this call)

Scott's grouper questions:

- edit the model and add as necessary

2012-09-12 scrum call

Attending

- Marie
- Benn
- Heather

Items covered for this sprint

- jira tickets listed here

Scruminess

- What have you done since the previous call?
    - Marie: worked on CO-438; simplified the proposed redirect solution and it is up on coriander for review (see diff also)
    - Benn: started working on CO-402 (prereq to get account linking working); still aiming for getting account linking done before I2FMM12

- What are you planning to do between now and the next call?
    - Marie: apply redirect solution to the other controllers (if code review is good)
    - Benn: continue working CO-402

- Any impediments/stumbling blocks?
    - Marie: no
    - Benn: no

Other notes:
Cake has a mechanism for handling sidebars in 2.2 which might be useful
Do we do a full .7 release for I2FMM12?

2012-09-14 dev call

Attending

- Heather
- Benn
- Marie

Items covered for this sprint

- jira tickets listed here

Scruminess

- What have you done since the previous call?
    - Benn - still working on CO-402
    - Marie - made the changes Benn suggestions; diff sent out and files uploaded to coriander

- What are you planning to do between now and the next call?
    - Benn - finish up CO-402
    - Marie - next steps dependent on outcome of feedback

- Any impediments/stumbling blocks?
    - Benn - physical injury
    - Marie - waiting on feedback to changes (to discuss on Dev part of call)

Dev business

- naming scheme for variables
    - the variable in question is the one added to the model or controller; there is no specific standard, but generally variables should be readable and understandable and ok if they are a little bit longer
- CO-438 discussion
    - see email thread to comanage-dev from Marie starting 10-Sep-2012 @ 11:53
    - punch list for ticket:

1. need tabified view for CO org people and edit tabs out of CO Person Roles (https://coriander.phys.uwm.edu/gears/co_person_roles/edit/1/co:1);
2. deleting an email address doesn't take you back to the same tab (but it should);
3. this view https://coriander.phys.uwm.edu/gears/org_identities/edit/1/co:1/tab:email vs that view https://coriander.phys.uwm.edu/gears/co_people/edit/1/co:1/tab:email (make the CO Person bar like the CO Org Person bars

- Keep the tiger stripes
- Keep the vertical white line
- The CO people groups tab requires the pencil icon
