Shibboleth Training Oct. 22-23 in Gainesville, Florida

For those looking to install or upgrade Shibboleth, InCommon's next Shibboleth installation training will take place Oct. 22-23, 2012, in Gainesville, Florida.

The InCommon Shibboleth Identity and Service Provider Workshops will provide you with technical installation and configuration experience with Shibboleth Single Sign-on and Federating Software, version 2.

Developed for organizations new to Shibboleth and those with existing implementations interested in upgrading to the v2 release, the workshops will offer the chance to:

- Install either a prototype Shibboleth identity or service provider in a virtual machine environment.
- Hear tips for configuring and running the software in production.
- Learn about integration with LDAP directories and selected packages.
  Registration is open – and details are available at www.incommon.org/educate/shibboleth

This Shibboleth Workshop Series event is sponsored by InCommon, Internet2, and the University of Florida.
