**AGENDA**

1. Call Schedule Change
  - a. Alternating weeks between API-focused calls and Use Case-focused calls
  - b. Everyone's welcome to both, but...
  - c. This week: Use Cases
2. We'll continue our discussion of notification protocols identity registries can use to signal events of potential interest to consumer systems. Jimmy Vuccolo from Penn State will join us again to provide more details about XMPP and JMS/STOMP support in the CIPHER-associated Central Person Registry package.
  - I can talk details next week, just wanted to pass along that I have things working.
  - I can send messages to ActiveMQ, which can be picked up by an XMPP client.
  - The cool thing is like I predicted the change from Queue to Topic within the CPR is only a couple of lines of code.
  - Here are current message formats that we send out from the CPR:
  - <https://wikispaces.psu.edu/display/IAM/Message+Formats+V0.75>
3. Selecting use cases, models for testing
  - a. How do we choose the models to test – democracy? autocracy? Monte Carlo?
  - b. How do we select use cases for model testing?
  - c. Nature of testing – tabletop, PoC, full reference implementation?
4. Next CIPHER P&I call in one week (18 December)

NOTE: CIPHER API calls are biweekly on Wednesdays at Noon Eastern, 9:00 am Pacific; Next CIPHER API call is on 12 December  
Same conference call line as this call, with access code 0121717#

**NAG**

1. April 30, 2013 Targets
  - a. *Demo solutions implemented and documented including recipes, tool choices and code snippets*
  - b. *Detailed roadmap for P&I deliverables over following 12-18 months*
