

Starting an Enterprise Architecture Practice Working Group

Starting an Enterprise Architecture Practice

Purpose

The Starting an Enterprise Architecture Practice Working Group provides framework materials intended to help colleges and university kick start their EA Practice.

Scope

Definition of EA

Enterprise Architecture is the process that translates business strategy into tangible executable solutions by analyzing current state, designing future state and creating road maps to fill the gap. The process holistically analyzes business, information and technology architectures to create the solution.

This framework will include processes, best practices and artifacts geared toward the culture of higher education.

Deliverables
