Scenarios

Abdiwahid has heard from a friend about urban anthropology. In particular, he is interested in analytical methods that blend graphic and textual. He looks up urban anthropology in the on-line catalog. He looks to the posted syllabus and course description for Anthro 350. He reviews the assigned readings. He finds out that this course can be used to satisfy primary requirements for his Sociology major. He establishes that he has all the pre-requisites.

Abdiwahid wishes his university had implemented the UW [MyPlan](#) or the Austin Peay [Degree Compass](#) as these would have removed the manual effort around:

1. Pre-requisite checking
2. Applicability to his program
3. Availability of the course
