

ITANA Personal Stories

We would like to gather a set of personal stories about how you have gained value from ITANA. We would select stories for our poster at EDUCAUSE and on our web site. New ITANA members have said that this would help them see how to engage and the kinds of things they might learn. This would also be a good addition to our outreach ability.

We will work on a template for the stories and post it below. If you are interested in writing a story, please let us know by emailing the list or contacting the chair directly.
