Agenda: NASA Call summary; strategy for next steps.

Notes

Brian - NTLM v1, verify NTLM v2 - replay, Kerberos - research

* NTLM v2 does address replay attacks - remove

Lee - 4.2.5.1 and 4.2.5.6 decide whether the past the hash fits under the criteria and is it addressed by what's in the table.

Eric - Password set events to the domain controller - is it secure and where does it go. Subject to IdP change password.

Mark - use cases captured and risk analysis for each must be address.
