Eric Goodman, UCOP

Next Call

May 10 at Noon ET
+1-734-615-7474 PREFERRED
+1-866-411-0013
0195240#

Agenda: Discuss [Questions for Microsoft](#) with Microsoft (tentative)

Action Items

- David Walker will revise [Questions for Microsoft](#) later today. **Please review by Tuesday, May 7** for call with Microsoft on Friday, May 10.
- Ann to contact Dean to join us on May 10. Also suggest he include Tim Myers, Security Program Manager, Common Criteria and FIPS 140-2 Security Evaluations at Microsoft
- Ann/David will develop some intro materials that summarizes the Assurance Program and upper level issues that the group has identified.

Notes

- We have decided to close the open issue in the 2012 AD Silver Cookbook about passwords being unencrypted in memory. We believe those IAP requirements apply to passwords in *storage* (e.g., disk storage), not memory.
- Specific issues related to [Questions for Microsoft](#), as well as a few background paragraphs, will be reflected in the next revision (later today).
