Coordination Team Standing Meeting Details

The main focus has now shifted to further development of the [IAM Testbed](#). A new call time will be arranged for that work.

Current work items

- [The IAM Testbed](#) is in the early phase of providing virtual environments for the setup, configuration, test and exploration of open source IAM software. The ultimate goal is to create an environment that provides an end to end reference implementation that supports demo solutions for a growing set of common IAM challenges in higher education and research.
- Functional models for CIPHER work streams
 - [Identity Registry Functional Model](#)
 - [Provisioning and Integration Functional Model](#)
 - [Authentication Functional Model \(Draft\)](#)
 - [Access Management Functional Model](#)
 - [Open issues, Orphaned functions](#) (If you don't know which work stream handles a particular function, just add it to this page)
- [Cross-Team Feature and Capability List](#) ("Wish List")

Archived work items

- [A Pitch for a Particular Style of Functional Model as a First-round Work Stream Deliverable](#)

References

- [Open Registry documentation](#)
