

Bronze and Silver AuthnContext Schema

AuthnContext Schema for InCommon Bronze and Silver

Below are draft AuthnContext schema definitions per section 2 of the [SAML V2.0 Identity Assurance Profiles Version 1.0](#).

Note that the governingAgreementRef attribute has value "<http://www.incommon.org/docs/assurance/IAAF.pdf>" in both schema.

InCommon Bronze AuthnContext Schema

```
<?xml version="1.0" encoding="UTF-8"?>
<xs:schema
    targetNamespace="http://id.incommon.org/assurance/bronze"
    xmlns:xs="http://www.w3.org/2001/XMLSchema"
    xmlns="http://id.incommon.org/assurance/bronze"
    finalDefault="extension"
    blockDefault="substitution"
    version="2.0">

    <xs:redefine schemaLocation="saml-schema-authn-context-types-2.0.xsd">

        <xs:annotation>
            <xs:documentation>
                Class identifier:
                http://id.incommon.org/assurance/bronze
                Defines the InCommon Bronze Identity Assurance Profile of the InCommon Identity
                Assurance Assessment Framework
            </xs:documentation>
        </xs:annotation>

        <xs:complexType name="AuthnContextDeclarationBaseType">
            <xs:complexContent>
                <xs:restriction base="AuthnContextDeclarationBaseType">
                    <xs:sequence>
                        <xs:element ref="GoverningAgreements"/>
                    </xs:sequence>
                    <xs:attribute name="ID" type="xs:ID" use="optional"/>
                </xs:restriction>
            </xs:complexContent>
        </xs:complexType>

        <xs:complexType name="GoverningAgreementRefType">
            <xs:complexContent>
                <xs:restriction base="GoverningAgreementRefType">
                    <xs:attribute name="governingAgreementRef"
                        type="xs:anyURI"
                        fixed="http://www.incommon.org/docs/assurance/IAAF.pdf"
                        use="required"/>
                </xs:restriction>
            </xs:complexContent>
        </xs:complexType>

    </xs:redefine>
</xs:schema>
```

InCommon Silver AuthnContext Schema

```
<?xml version="1.0" encoding="UTF-8"?>
<xss:schema
    targetNamespace="http://id.incommon.org/assurance/silver"
    xmlns:xss="http://www.w3.org/2001/XMLSchema"
    xmlns="http://id.incommon.org/assurance/silver"
    finalDefault="extension"
    blockDefault="substitution"
    version="2.0">

    <xss:redefine schemaLocation="saml-schema-authn-context-types-2.0.xsd">

        <xss:annotation>
            <xss:documentation>
                Class identifier:
                http://id.incommon.org/assurance/silver
                Defines the InCommon Silver Identity Assurance Profile of the InCommon Identity
                Assurance Assessment Framework
            </xss:documentation>
        </xss:annotation>

        <xss:complexType name="AuthnContextDeclarationBaseType">
            <xss:complexContent>
                <xss:restriction base="AuthnContextDeclarationBaseType">
                    <xss:sequence>
