2013-08-21 Cohortium Notes

Notes from the 8/21/2013 Cohortium Meeting

Date and Time	August 21, 2013, 2:00p-3:00p EDT
Agenda and Meeting Materials	2013-08-21 Cohortium Agenda
Recording	

Action Items

- In Alternative Strategies When Multi-Factor Tokens Are Not Available, David Walker will clarify that the strategies presented are only examples. We will solicit more examples from the Cohortium membership.

Highlights

- Multiple institutions are interested in CAS enhancements to enable multiple authentication methods and MFA.
- Mike Grady attended the recent IDESG meeting at MIT
    - There's a good amount of interest in our work on alternate strategies for lost tokens.
    - MIT is doing interested work with cell phones as tokens; they're working a Shib-based opt-in MFA service
    - IDESG will be funded at least into Summer/Fall of 2014.
- Cohortium members are asked to contribute to Status of MFA and Business Justifications documents.
- In Alternative Strategies When Multi-Factor Tokens Are Not Available, David Walker will clarify that the strategies presented are only examples. We will solicit more examples from the Cohortium membership.
- There is overlap among the strategies. We'll clarification that we're presenting only example strategies, and we'll create a table summarizing the breadth of scenarios where strategies might be used.
