

# Face2Face 2013 Resources

## Presentations and Handouts for the ITANA Face2Face 2013 meeting.

A quick note to the attendees: We try to make the content as current as possible. People will be building their case studies based on what is happening on their campus right now. Their presentations may be missing or may not match what they present exactly. We believe that currency of information and real-time "what's happening on my campus now" is important. We will update these as soon as we get the presentations.
