

2013-12-11 Cohortium Agenda

Agenda for MFA Cohortium meeting: 12/11/2013 2:00 PM EST

These calls are held every other Wednesday in this same time slot. Next call won't be until 01/08/2014 (after New Year's), as we'll cancel, of course, the call that would fall on Christmas Day.

- Greeting and any agenda mods
- Internet2 Intellectual Property Framework: <http://www.internet2.edu/membership/ip.html>
- Old business (information)
- Standing updates (information)
 - Scalable Privacy Project
 - [Shib Assurance/MFA RFP](#)
 - CAS Assurance/MFA work
 - [InCert](#)
 - Reports from subgroups
 - **No recent meetings to report on because of conference and holiday conflicts:** Technology issues Subgroup
 - [2013-12-06 - Deployment Strategies Subgroup Notes](#) - Tom Scavo
 - **No recent meetings to report on.** There was a planned agenda -- [2013-12-04 - Business Case Subgroup Agenda](#), but no one was able to make that call.
- Eve Maler, Forrester Research (<http://www.forrester.com/Eve-Maler>):
 - *I cover MFA for Forrester, and a few months back I published a "Customer Authentication Assessment Framework" that was based on the **Quest to Replace Passwords** framework. Now I'm concluding a broader **Authentication Market Overview** that leverages the same organizational principles.*
I will speak about why and how I revised the original 25 benefits, along with how the vendors and solutions in the marketplace are stacking up against them (my version currently has 26). I've managed to get 2+ dozen vendors to participate in this latest effort, and I'll probably end up with 3-4+ dozen individual solution assessments. This will be published as a document entitled "Market Overview: User Authentication Solutions in 2013, Part 1 Of 2; Forrester Sees Seven Major Trends, Including Attempts To 'Kill The Password'". I will discuss all this, and also the specifics around how we enhanced the UDS criteria in looking at specific solutions for Part 2 of the research.
- Current Cohortium white papers
 - Last call for comments - approval at 12/11/2013 meeting (discussion)
 - [Business Drivers & Deployment Decision Tree diagrams](#)
 - [How Much Security Is Enough?](#)
