Agenda:

- Review Eric's latest draft of the Cookbook: [InCommon Silver with Active Directory Domain Services Cookbook - RC20140115](#)

Notes

- **No call until January 3, 2014. Happy Holidays!**
- Eric will revise the document according to the discussion. This includes the minor restructuring suggested by David in his electronic mail just prior to the call, as well as some changes to the acknowledgments, mostly to recognize the people who worked on the 2012 version of the Cookbook.
- Please send comments to the list after Eric has posted his edits. We will finalize this draft as a release candidate in our January 3 call for discussion with the assurance community on January 8.
