

# UI-2 Guidelines

To be applied as views are refreshed.

1. Accessible Design
  - a. <http://www.w3.org/standards/webdesign/accessibility> - in particular, UI-2 aims at [WCAG 2.0 AA](#) compliance.
2. Intuitive Behavior / Workflow (User-centric)
  - a. Rapid Feedback (eg: busy spinner on submit)
3. Responsive Design
  - a. Menus collapse on smaller screens
  - b. *Index views add and remove columns according to screen width*
4. Mobile / Touch Friendly
5. *Edit In Place / Minimize Page Loads*
6. *Contextual Help*
7. Fully Internationalized
  - a. UTF-8 Compatible (including multi-byte and right-to-left languages)

*Items in italics are not yet fully developed as of COmanage v.3.0.0 which is the first full release to introduce UI-2.*
