April 30 IAM Online - MFA, Assurance, and the Multi-Context Broker

Multifactor Authentication, Assurance, and the Multi-Context Broker

IAM Online – Wednesday, April 30, 2014

3 pm ET / 2 pm CT / 1 pm MT / Noon PT
www.incommon.org/iamonline

Is your campus considering the implementation of multifactor authentication to bolster security beyond passwords? Are you considering implementing multiple local or InCommon Assurance profiles? If so, and you use Shibboleth single sign-on software, your job just got easier. Join us for this IAM Online to hear about the needs for multifactor authentication and assurance at two universities, and how those needs are met by the new Multi-Context Broker.

With partial funding from the National Strategy for Trusted Identities in Cyberspace (NSTIC), the Internet2 and InCommon communities have released the Multi-Context Broker, an extension to the Shibboleth software that makes it easier for your organization to support the increasing demand for multifactor authentication and identity assurance, while simplifying the user experience.

See this wiki page for more information about the Multi-Context Broker: https://spaces.at.internet2.edu/x/BozFAg

Speakers:

- David Walker, InCommon Technical Advisory Committee
  * Keith Wessel, Identity Management Service Manager, University of Illinois at Urbana-Champaign
- David Langenberg, Senior Systems Programmer, University of Chicago

Connecting

We use Adobe Connect for slide sharing and audio: http://internet2.adobeconnect.com/iam-online. For more details, including back-up phone bridge information, see www.incommon.org/iamonline.

About IAM Online

IAM Online is a monthly online education series brought to you by Internet2's InCommon community and the EDUCAUSE Higher Education Information and Security Council.
