Registry Permissions

Generally, Registry permissions are based on the type of user a person is. These types are generally based on group memberships, and include administrative users as well as non-administrative users.

Permission	CMP Administrator	CO Administrator	COU Administrator	Group Owner	Group Member	CO Person	Anonymous
Configure COmanage platform	•						
Configure CO	Ø	Ø					
Start Enrollment		Ø	If configured		If configured	If configured	If configured
Manage CO Person	•	Ø	within COU			See Self Service Permissions
