Face2Face 2014

ITANA Face2Face 2014. Governance and EA: Delivering Impact

Enterprise and business architecture work in harmony with governance to drive the institution's strategy. Case studies will highlight different forms of governance and architecture working together. Discussion and work groups will help you evaluate how you can best engage to drive change at your institution.

OUTCOMES: Discover how architects have leveraged different types of formal and informal governance to drive change * Explore and evaluate your own campus and practice to find where you should engage next * Learn how you can link strategic vision as an architect to an institution's governance structure
