

Notes 10.15.2014 Conference Call

Agenda

Roll Call

- Agenda Bash
- Strategies and assessment grid
 - Review example deployments
 - Review use cases and check on status of approval requests for vendor use cases
- Report
 - Draft and discussion (a link to the draft is forthcoming)

Call Notes

- Attendees
 - Mark Scheible, MCNC
 - David Walker, Internet2
 - Scott Koranda, Spherical Cow Group
 - Steven Carmody, Brown University
 - Ben Poliakoff, Reed College
 - Lou Delzompo, California Community Colleges
 - Dedra Chamberlin, Cirrus Identity
 - Mark Beadles, OARnet
 - Chris Phillips, CANARIE
 - Shaun Abshire, WiscNet
 - Janemarie Duh, Lafayette College
- Example deployments/use cases
 - Move white space to the bottom of the grid
 - Confirmed Google Apps Gateway is same as Cirrus solution. copy row content.
 - Chris: IdP installer - runs Shib IdP 2.4 deployed on CentOS. Connects to AD. CANARIE ships the installer. Used by Swedish and Canadian federations. Looking at CAS in addition to LDAP.
 - Will go over Shaun's case if there is time (didn't have time)
 - Mark Scheible will check on OARnet use cases
 - Dedra has permission to release Cirrus use case
- Report
 - Add section on future recommendations
 - Reference sections for systems which would apply to Hub and Spoke
 - Decision tree or flow map
 - Rework the introduction as an executive summary
 - Is Java synonymous with Linux deployments?
 - Are any of the "tech basics" columns not critical to a deployment? This could be a discussion point during ACAMP. Do they apply to InCommon now or later?
 - Brainstorming: futures section, additional considerations, vendor/campus mentors
