

# External Identities Work Group Meeting - 2014-12-04

## DRAFT External Identities Work Group Meeting - 2014-12-04

### Agenda

- Roll call
- [Internet2 Intellectual Property Framework](#)
- Agenda bash
- Review of the homework assignment people have been working on this week.

### Notes

- [Evaluating External Identity Providers](#)
  - "Documented" needs to carry more interpretation of what and how it's documented.
  - We'll create 2-3 use case categories and provide desired answers for each.
    - Use external identity as is
    - Integrate external identity into IdMS, creating a local identity
    - Something about how an SP sees this as a local identity without visibility of the fact that it's external
- No call until next year, on 1/15/2015

### Action Items

- The following vendor assessments will be done for our next call:
  - Google: Bill Weems and Mark Jones
  - Yahoo!: John Breen
  - Twitter: John Breen
  - LinkedIn: John Breen
  - Facebook: Eric Goodman
  - Amazon: Kevin Foote
  - Microsoft: Mary Dunker (note, this includes identifying exactly what service "Microsoft" represents. E.g., Outlook Express vs. Skype vs. LiveID vs. ???)
  - UnitedID: David Walker
- Eric and David will draft a strawman outline for our report
