

January 19, 2010

NTAC Peering
1/19/10

In attendance: Jeff Ambern, Jeff Bartig, David Crowe, Leo Donnelly, John Hess, Caren Litvanyi, Darrell Newcomb, Chris Robb, Linda Roos, Steve Wallace

Agenda

1. Update from Internet2
2. Draft document

Notes

1. Update from Internet2

Chris Robb mentioned that the interconnects are up in LA, Chicago, DC and Seattle. He also indicated that they have been able to ping across them and that Seattle is working.

2. Draft document

Jeff sent a draft document just prior to the call. It would be sent to all of the connectors using CPS and CENIC would communicate this to TR, too. Based on that audience, most on the call thought that the note seemed reasonable. It was suggested that the regionals send it to their downstream CPS users.
