## Living Documents

Documents listed on this page are collaborative works-in-progress. If you wish to "checkout" a document, follow these steps:

1. Download the desired attachment.
2. Leave a note on this page indicating you have checked out the document.
3. Modify the document as desired.
4. Upload the modified document.
5. Remove the note (thereby indicating that the document is available for checkout).

When you upload a modified version of the document to the wiki, **do not change the name of the document** since that is what triggers version control. The wiki automatically creates a new version of the document while archiving the old version. Click on "manage" at the bottom of the page to see how version control works.

- Tom Barton, Jim Basney, Tim Freeman, Tom Scavo, Frank Siebenlist, Von Welch, Rachana Ananthakrishnan, Bill Baker, and Kate Keahey. *Identity Federation and Attribute-based Authorization through the Globus Toolkit, Shibboleth, !GridShib, and !MyProxy*. Proceedings of the 5th Annual PKI R&D Workshop (To appear April 2006). <http://grid.ncsa.uiuc.edu/papers/gridshib-pki06-draft.pdf> (October 2005)

<!-- TomScavo checked out pki06-draft on Fri, Feb 3 @ 11am CT

The document will be checked in by 3pm today. -->
