

Call for Community Feedback to NIST Electronic Authentication Guideline SP-800-63-2

Update as of June 2015

Based on community input on SP-800-63-2, AAC Chair Jacob Farmer sent these comments to NIST on May 22, 2015:

From: Farmer, Jacob
Sent: Friday, May 22, 2015
To: eaauth-comment@nist.gov
Subject: Comments on SP 800-63-2

Dear Colleagues,

InCommon, a FICAM Approved Trust Framework Provider, is providing the following feedback in response to the call for comments on SP 800-63-2[1].

In surveying the Higher Education community, the primary concern articulated is that the structure of the NIST LoAs – and by extension, the InCommon profiles – is monolithic and does not map well to the business challenges commonly experienced in Higher Education. An approach that allows for the decoupling of identity proofing and credential quality would support more use cases and likely spur more adoption.

On behalf of InCommon, we strongly encourage you to adjust the composition of the LoA in 800-63 to allow more flexibility in this regard.

Sincerely,

Jacob Farmer
Chair, InCommon Assurance Advisory Committee

Call for Community Input, April 2015

Colleagues,

NIST is requesting comments on Electronic Authentication Guideline SP 800-63-2 [1] by May 22, 2015 with the goal of gathering requirements for a substantial update of the spec. Please see the [call for comments](#), and especially the "Note to Reviewers" [here](#).

The InCommon Assurance Advisory Committee (AAC) will be preparing comments and would appreciate your input. Please share your thoughts on the InCommon Assurance email list at assurance@incommon.org. (If you are not that list, please add yourself by sending an email to sympa@incommon.org with this in the subject: **subscribe assurance**)

I hope that we can have a robust and productive conversation around our desired changes to this important document.

Please provide any feedback to the list by May 8, 2015. After that time, the AAC will work with InCommon to create a draft response, which we will share with the InCommon Assurance list for one final round of comments before the May 22, 2015 deadline.

Best regards,
Jacob Farmer, Indiana University
Chair, InCommon Assurance Advisory Committee
