

# Face2Face Fall 2015

Enterprise architecture (EA) needs to develop signature-ready recommendations. The shift is toward actionable artifacts that both business and technology can act from. What are they, how do you build them, why now, and what is different in your practice? Work with your peers to discuss, define, and learn about signature-ready EA.

## Agenda for the day:

| Time              | Section   |
|-------------------|---|
| 8:00-8:15 AM      | Into and Overview of the day<br>Meet and Greet<br>Facilitation as a second theme for the day  |
| 8:15-8:30         | Attendee Introductions - Ice Breaker, <a href="#">Appreciative Interviews</a>   |
| 8:30-9:00         | Kick off Presentation - Jim - Vietnam   |
| 9:00 - 9:15       | Kick off Table Discussion - What is signature ready? Why is it important? What next steps are inferred by it? What documents to you use now; are they signature ready? What is the definition of Signature Ready? How is it different at different levels of Architecture Stack? <a href="#">Notes from session</a> . |
| 9:15 - 9:45       | Interactive Case Study - Strategy On A Page   |
| BRE<br>AK         |   |
