Team members as stakeholder representatives

Stakeholders, Influencers and Influences

Different audiences will need to be invited to engage on different aspects of this work. It will be important for Working Group members to bring the perspective and represent the interests of at least the following stakeholder groups. Please edit the page and put your name under the type of stakeholder whose interests you agree to actively represent in working group activities. Feel free to add more types of stakeholders to the end of the page if you think we are missing an important category.
