

Entity Registry Working Group

PLEASE NOTE: As of Feb. 2016, The TIER Entity Registry Working Group, chaired by Warren Curry, University of Florida, has a [home base wiki page here](#)

This is an older page, and is not longer relevant and will be deleted in the future.

Group Members

Tom Jordan, Marlena Erdos, Brett Bieber, Jon Miner, Benn Oshrin, Eric Goodman, Warren Curry, Gabor Eszes, more welcome....

Draft Charter

Requirements on an Entity Registry

- From CIPHER Registry Team
- From CIPHER Enrollment (Registration) Requirements
- From TIER campus surveys
- From U Florida (courtesy of Warren Curry)

Functional Model for Entity Registry and Allied Services

- Identity Registry Functional Model (Sept. 2011, CIPHER)

Schema for core IAM resources

- Prior work: CIPHER SOR-Registry Core Schema Specification
- Gabor's overview: <https://gist.github.com/geszes/3d4b9ff49441058db434>
- Draft Based on Schema.org: <https://gist.github.com/geszes/6bfd8926bde03786a63>
- Clemson Authology schema: <http://authology.org/doc/VaultServiceReference/vaultServiceReference.html>
- Person Schema Comparisons:
 - <https://spaces.at.internet2.edu/display/cifer/SOR-Registry+Core+Schema+Strawman>
 - <https://gist.github.com/geszes/a889d023a3a26a763c6f>

Member-contributed Resources

- University of Wisconsin - UDS Person Schema
- Comparison of UW-Madison UDS Person API and CIPHER API
- [Rob Carter thoughts on fine-grained authZ on APIs for data access](#)
