## **Example Base-Level MFA Technologies**

Please add your suggestions for this list of widely-deployed MFA technologies to this list. We're primarily looking for classes of technologies (*e.g.*, smart phone app or key fob), but feel free to specify vendors or products, if you think they warrant individual mention.

- Second factor only (used in conjunction with username/password)
  - ° Duo
  - OTP tokens (Do we care if these are hardware or software? Does this include SMS codes?)
  - ° U2F
    - Mobile app (Duo, Google Authenticator)
      Telephone callback (IVR)
- Multi-factor tokens
  - PKI with PIN or passphrase
