[Grouper Web Services](#)

Description

Find attribute definitions based on name or ID or other criteria. This is new as of Grouper v2.3.0

Features

- Find attribute definitions based on list of names, ids, or indexes)
- Search by wildcard string (search filter)
- Search by parent folder (only in that folder or also subfolders)
- Lookup the attribute definition by name, id, or index
- Non-lite service can search for multiple attributeDefs at once by name/id/index
- Returns attribute definition(s)
- Can page and sort the results
- Can actAs another user

findAttributeDef Lite service

- Accepts individual arguments, can only lookup one attributeDef by name/id/index or can search for multiple...
- Documentation: [SOAP](#) (click on findAttributeDefsLite), [REST](#)
- For REST, the request can put data in query string (in URL or request body)
- REST request (colon is escaped to %3A): GET /grouper-ws/servicesRest/v2_3_000/attributeDefs
 - Note: if passing data in request body e.g. actAs, use a POST
- (see documentation above for details): [Request object](#), [response object](#)
- [Response codes](#)
- [Samples](#) (all files with "Lite" in them, click on "download" to see file)

findAttributeDef service

- Accepts multiple arguments, can lookup multiple attributeDefs by name/id/index or can search for multiple
- Documentation: [SOAP](#) (click on findAttributeDefs), [REST](#)
- REST request (colon is escaped to %3A): GET /grouper-ws/servicesRest/v2_3_000/attributeDefs
- (see documentation above for details): [Request object](#), [response object](#)
- [Response codes](#)
- [Samples](#) (all files with "Lite" in them, click on "download" to see file)
